

# Physics 211 Skeleton of Paper Outline:

## Introduction:

- Thesis Statement: This paper argues \_\_\_\_\_ because \_\_\_\_\_

## Body 1:

- Present your first piece of evidence of bad science
- Counter their findings or argument with an analysis of their method
  - Provide:
    - Why are they wrong?
    - Reasoning for why what you're proving is correct
- Present the Counterargument or the Rebuttal of your Opponents of your Thesis and Analysis (Some may argue \_\_\_\_\_)
- Counter the Counterargument (Cover your opponents' reply with reasoning)
- Tie it all back to your Original Claim or Thesis

## Body 2:

- Present your second piece of evidence of bad science
- Repeat the steps as demonstrated in body paragraph one

## Conclusion:

- Re-present what your paper argues BRIEFLY
- Then, extrapolate to a broader topic related to your thesis or the supporting evidence of your thesis

**\*\*** You can have as many bodies necessary to prove your argument, we just recommend at least two to get you to the word count.
