

FALL 2015
PHY 399/PHY 600

Practicum in Physics Education

hands-on course about
teaching and learning physics

Undergraduate Students

Did you do well in your introductory physics courses?

Do you want to learn techniques to be a successful peer coach, helping students with challenging concepts and bridging between students and faculty?

Undergraduates enrolled in PHY 399 can elect to take this course for 1-3 credits.

A short application is required to add the course (use the QR code or go to <http://goo.gl/3N0WTg>)

Graduate Students

Are you a teaching assistant who would like to learn practical advice about how to help students learn physics?

Would you like to enhance your teaching credentials on your CV or resume?

Graduates enrolled in PHY600 will take the course for 3 credits, with an extra workshop W 12:30-1:50pm.

No application is required.

Students in this course will reflect on and develop their views on teaching and learning, make connections to relevant education theory and literature and **try out a variety of strategies** with students and revise these strategies according to experience. All students in this course must sign up to be a TA or peer coach in Fall 2015.

Instructor: Prof. Manning
Course meets M 12:30-1:50pm
